ITALDEM CRUSHER BUCKETS GF 45/ GF 35 / GF 20

The ITALDEM Crusher Buckets are machines used for both the recovery of aggregate materials from demolition sites or the recovery of quarry materials extracted from caves.

The increasing attention to the environment and the problems of disposal of materials makes the ITALDEM crushers an indispensable solution at low cost, since they allow crushing on site avoiding storage, unused materials and eliminating totally transportation costs for landfilling.

ITALDEM crusher buckets are very versatile and can be used by operators both in small shipyards or large construction sites.
